## **ANNUAL WATER QUALITY REPORT (Consumer Confidence Report) FOR CALENDAR YEAR 2015 NOW AVAILABLE FOR REVIEW**

The THDWID employs a State of Arizona Certified Water Operator. His primary function is do required testing of our water quality to make sure it meets state and federal drinking water standards. The results are reported to consumers and the Arizona Department of Environmental Quality (ADEQ) annually in a Consumer Confidence Report (CCR). Because our water supply is treated and delivered by Scottsdale, our CCR includes the results of Scottsdale's required testing as well.

Because we serve less than 500 people, we are not required to mail the CCR to our members, but we are required to make the CCR available on request. This year's CCR, together with all past CCR's prepared by the THDWID, is posted on the community website. In addition, the current CCR is posted on the bulletin board at the community mailboxes, and this notice of availability is included with the water bills and is emailed to those members who have given us permission to contact them by email.

To locate the CCR on the community website, follow these steps:

1. Go to [www.tontohillsdwid.org](http://www.tontohillsdwid.org)
2. Click on "DWID" in the green banner below the website photos
3. Click on "DWID Documents" in the drop down menu
4. Click on the Category "DWID Water Quality Reports"
5. Finally, click on the CCR for the year you are interested in reviewing

If you have any questions after reviewing the report, please don't hesitate to contact me via the email, U.S. Mail, or office telephone information shown in the letterhead above.
